

•• 100% GREEN •• and PLASTIC-FREE METHOD TO FILTER TAP WATER

Kishu charcoal is the plastic-free way to delicious tasting water. Simply place the appropriate size in a pitcher, a water bottle, or a large jug—add tap water—watch Kishu go to work filtering out impurities and enhancing the taste of your water. **Kishu is also available for Pet Water Bowls.**

Made by artisans, using traditional methods, Kishu Charcoal begins as **BRANCHES OF SUSTAINABLY HARVESTED OAK TREES** are placed in a kiln until 1000 degrees and many days later, the dense, glass-like material (Kishu) emerges.

This is the process that makes Kishu Charcoal such a fantastic eco-water filter! **ONE STICK LASTS FOUR MONTHS** and then can be reused as a deodorizer (refrigerator or garbage pail). **KISHU IS COMPLETELY COMPOSTABLE**—break it up and use it to enhance soil in the garden.
